

INTRODUCTION

SturFrame offers two kinds of beads with corrugate or mesh pattern surface to meet different applications. They are either made by aluminum alloy 3003 or G.I. sheet by standard of ASTM E1251 and tested in accordance with ASTM G154 and ASTM B117 standards with excellent corrosion and weather resistance. SturFrame beads are light weight but durable and strong. With special design of the flanges, the beads are able to provide protection to edge of different kinds of boards or corner of drywall and ceiling.

CHARACTERISTICS

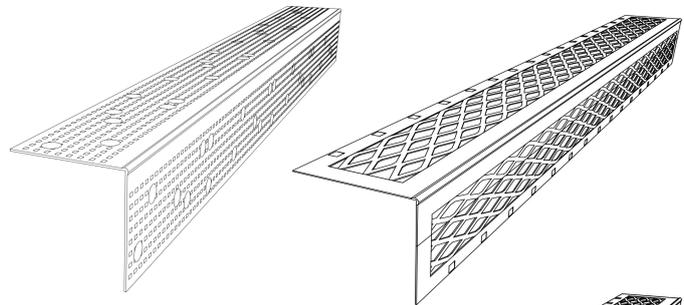

- Simple and essay fixing
- Wide range of applications
- Lightweight and durable
- High tensile strength
- Corrosion & weather resistance
- Comply with ASTM C1047

APPLICATIONS

a. Corner Bead

It is used to protect the drywall or ceiling corners.

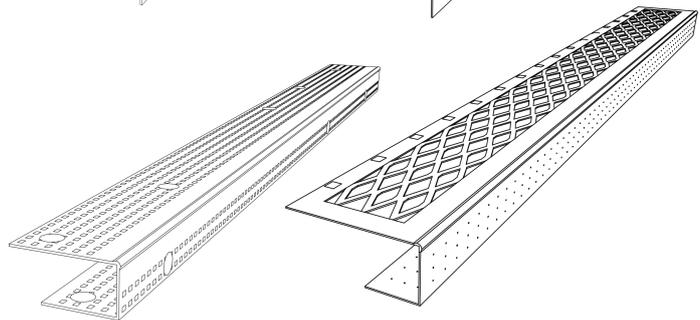

Dimension: 30x30mm
Length : 2440mm

b. J-Bead

It is used to protect the edge of boards.

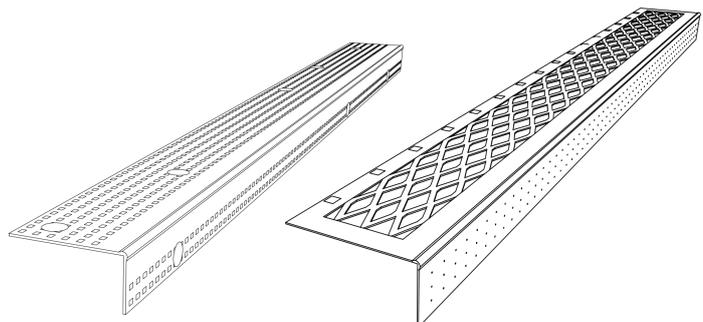

Dimension: 13x13x30mm
Length : 2440mm

c. L-Bead

It is used to protect the edge of boards.

Dimension: 13x30mm
Length : 2440mm
