

## Product Description

The STURFRAME CEILING HANGER is designed for suspension of false acoustic ceilings and pipes, ducts and other mechanical equipment for loads ranging from 20–150kg. The spring fixes on a rubber sleeve, preventing the contact between the steel frame and the threaded rod and so to isolate vibrations.

## Characteristics

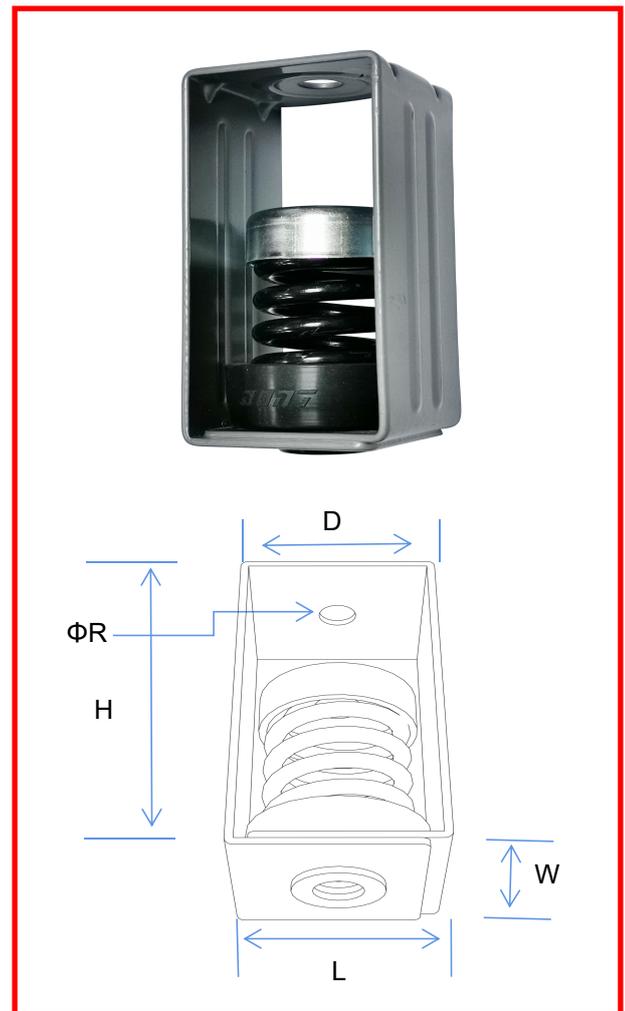

- Powder coated steel frame
- Simple and easy fixing
- Capable of up to 30° angular misalignment
- Wide range of applications
- High strength and durable
- Corrosion resistance

## Applications

- Ceilings
- Pipe-works
- Axial Fans and Fan Coil Units
- Duct work and Attenuators
- Exhaust Systems
- Other Suspended Equipments

## Installation Instructions

First remove the spring and rubber sleeve and you are ready to fasten the mount in the ceiling. Then replace the rubber sleeve, spring and spring cap. Thread the drop-rod through the spring and bolt in place.
